The screenshot shows the WebLogic Administration Tools Portal interface. At the top, there's a navigation bar with links like 'Users, Groups, & Roles', 'Interaction Management', 'Portal Management', and 'Server Administration'. Below the navigation bar, there's a search bar and a sidebar on the left labeled 'Virtual Content Repository' which lists categories like HR, Images, Marketing, and Products.

The main content area is titled 'Change Repository Configuration' for the 'BEA Repository'. It contains fields for 'Repository Name' (BEA Repository), 'Connection Class' (com.bea.content.spi.internal.RepositoryImpl), 'Username', and 'Password'. Below these, there's a 'Repository Cache Settings' section with two tables: 'Node Cache' and 'Binary Cache', each with 'Maximum Entries' (50 and 10 respectively) and 'Time To Live (seconds)' (60000 and 60000 respectively). There are also checkboxes for 'Is Enabled' in both sections.

At the bottom of the configuration form, there are 'Add Property' and 'Update' buttons. The entire window has a title bar 'Weblogic Administration Tools Portal - Microsoft Internet Explorer provided by Flesler Dubb Meyer & Lovejoy' and a status bar at the bottom.
